

INSIGHT

Revenue Performance

- **Total purchase revenue: \$5.65M.**
- **Potential revenue: \$12.95M** (if carts were also purchased).
- **Maximum potential revenue: \$62.35M** (including views).
- **Purchase rate: 9.06%** (conversion from view → purchase).

Product & Brand Insights

- **Most purchased category:** *Electronics.*
- **Top revenue brand:** *Apple.*
- **Top quantity sold brand:** *Samsung.*
- **Why Apple leads in revenue:** higher product prices → more revenue despite fewer units.

User Insights

- **Total users: 144.34K.**
- **Highest purchaser:** *User 165321* (by revenue).
- **Most orders placed:** *User 1000120.*
- **State with highest users:** *Georgia (GA).*

Discount Impact

- Majority of items purchased **without discounts.**
- In **November**, revenue from **discounted products increased** significantly.
- Discounts make Apple products more attractive → more Apple sales during discounts.

Time Trends

- **Revenue in November** grew **+19.61%** compared to October.
- **User count** also grew by **+19.61%** in November.
- **Sunday** generated the most revenue.
- **Peak traffic time:** *3:00 PM.*

Key Takeaways:

1. Apple dominates revenue due to pricing, Samsung dominates quantity due to volume.
2. Discounts trigger **brand preference shifts** (toward Apple).
3. Huge gap between **potential revenue (62.35M)** and **actual revenue (5.65M)** → conversion optimization is a big opportunity.
4. November performance boost (+19.61%) shows seasonality / marketing impact.
